## WORKSHOP OVERVIEW

Ontario's labour market is being rocked by major influences including the evolution of **A.I.**, a massive **increase in immigration**, an ongoing **skills shortage** and a **looming recession**. This year's **Ontario Labour Market Year-in-Review Workshop** will provide practical insights into how jobs are changing; strategies for employers to consider in recruitment and retention; how A.I. and other automation will impact the labour force; and how to best advise students or job seekers in building an in-demand skills set. The following is a list of topics we will address in the workshop:

- *10 year occupation projections*
- *Local labour market analysis examining the growth of local jobs and industries*
- *BRAND NEW Census Data and recent research broken down for individuals with disabilities; new Canadians; women, youth and Indigenous Canadians*
- *The changing role of job development; how to become LMI subject matter experts*
- *How to share labour market analysis during a time of increased client or student volume*
- *Identifying occupations which are resilient during economic downturns*
- *Overview of key labour market research, reports and labour market tools released during 2023*

We have in-person workshops in five different communities as well as one online workshop. All workshops will take place from 9:30 to 3:30 with a one hour break for lunch.
